

vonRollhydroport[®] - Manual Update

vonRollhydroport[®] will inform you periodically about available updates. In case of lack of automatic information, an update can also be installed manually.

And it is so simple...

1. Check your **vonRollhydroport[®]** version number. This number you will find in menu “?” under “**Information about hydroport**” (e.g. 1.0.1).
2. Go to the vonRoll hydrotec website <http://www.vonroll-hydro.ch>. The pages „**Downloads**” contain the newest updates for **vonRollhydroport[®]**.
3. Select the update pack (“**update.zip**”) for your present version and save it on the hard disc of your computer.
4. Start the application **vonRollhydroport[®]**.
5. Select in menu “**File**”, “**update hydroport**” and set installation source to “**Local copy**”.
6. Click on “**Select path to store...**” and select the file “**update.zip**”, which you have downloaded on your hard disc from the internet in step 3.
7. Push the “**Start**” bottom and the update procedure will be initiated.

8. A click on “**Install**” closes **vonRollhydroport[®]** and starts the update procedure.
9. Follow further the instructions shown on the screen. After the update, **vonRollhydroport[®]** will be restarted automatically.

****Important remark:** Manual update must be executed step by step depending your present version. As an example: if your present version is 1.0.0., you have to update to 1.0.1 and consecutively from 1.0.1 to 1.0.2., then to 1.0.3.

Data already stored, e.g. hydrants, settings, etc. will remain saved.
